Requirements:

- Bachelor of Engineering degree
- Minimum of 10 years of experience in mechanical engineering, with proven ability to run projects independently and as part of a team
- Proficiency in Autodesk Inventor and Vault preferred
- Knowledge of industry standards, regulations, and best practices
- Ability to communicate effectively with team members and clients
- Excellent problem-solving and analytical skills

Responsibilities:

- Design, develop, and test mechanical systems and devices for various projects
- Collaborate with team members to meet project goals and deadlines
- Manage and oversee project timelines, budgets, and resources
- Provide technical expertise and support to other departments
- Communicate project updates to team members and clients
- Ensure compliance with industry standards, regulations, and best practices
- Continuously improve processes and procedures to increase efficiency and productivity

If you are a highly motivated Mechanical Engineer with a passion for design and manufacturing projects, we encourage you to apply for this exciting opportunity. We offer competitive salary and benefits packages, professional development opportunities, and a supportive work environment.
